Fictional application, for training only.

Personal Statement

I am a student in Chemistry and I am applying to the Student Opportunity Fund for one purpose: supplies for an independent research project. This opportunity connects directly to what I want to do after graduation, and I could not cover the full cost on my own this year.

Over the past year I have taken on more responsibility in my program, including helping newer students and working part time on campus. I have planned the costs carefully and kept them as low as I can, as the budget shows.

If I receive an award, I will share what I learn with my department, and I will submit the short report the fund asks for within a month of finishing.

Unofficial Transcript

Student: APP-007

Program: Chemistry, BS

Issued by the Registrar's office, October 2026. Unofficial copy.

Term	Course	Credits	Grade
Fall 2024	General Chemistry I	3	A
Fall 2024	General Chemistry II	3	A
Spring 2025	Organic Chemistry I	3	A
Spring 2025	Organic Chemistry II	4	A-
Fall 2025	Analytical Chemistry	3	B+
Fall 2025	Calculus II	3	B
Spring 2026	Physics I	3	A
Spring 2026	Physical Chemistry	4	B

Cumulative GPA: 3.43

Academic standing: Good standing

Reference 1

I am pleased to recommend applicant APP-007 for the Student Opportunity Fund. I have known the applicant for about two years, as their supervisor.

The applicant has worked with me on a project this year. They keep good records, meet deadlines without reminders, and are quick to tell me when something isn't working.

The activity described in this application fits their goals well, and I expect they will make good use of it. I recommend them without reservation.

Reference 2

I am writing again in support of this applicant. This letter updates the one I sent earlier this month, now that I have seen the final plan for the project.

In my course the applicant stood out for steady, careful work rather than last-minute effort. Their written work improved a great deal over the year, and they take feedback well.

The activity described in this application fits their goals well, and I expect they will make good use of it. I recommend them without reservation.

Budget

Applicant ID: APP-007

Item	Amount
Lab supplies	$685
Reagents	$540
Sample shipping	$120
Poster printing	$70
Amount requested from the fund	**$1,415**

Costs are estimates based on current prices. Receipts will be kept.

Application Form, Part 2: Declaration

I confirm that the information in this application is true and complete. I understand that awards must be used for the purpose described, and that I must return any unused funds and submit a short report within one month of finishing the activity.

I agree that the Operations Office and the scholarship committee may contact my referees and check my enrollment.
